

White Paper of the Flame Metaverse Token

About:

Mark Zuckerberg was the inspiration for Metaverse.

Facebook's name has been changed to "Meta" in a move away from social media and toward the development of "the metaverse," a digital environment that might be the next generation of the internet and cryptocurrency.

We invite you to join the Flame Metaverse family as we work together to construct the metaverse by cooperating and learning as a community to deliver an even more connected world of developer solutions.

Enjoy a simple and integrated crypto game in which you can earn cryptocurrencies in the form of cryptocurrency.

Description:

The term "Flame Meta" is the newest buzzword to catch the attention of the IT sector, to the point where one of the most well-known online platforms is rebranding to reflect its support of the futuristic concept.

Metaverse Meaning?

Think of it as the internet brought to life, or at least rendered in 3D. Zuckerberg has described it as a “virtual environment” you can go inside of — instead of just looking at on a screen. Essentially, it’s a world of endless, interconnected virtual communities where people can meet, work and play, using virtual reality headsets, augmented reality glasses, smartphone apps or other devices. It also will incorporate other aspects of online life such as shopping and social media.

WHAT WILL I BE ABLE TO DO IN THE METAVERSE?

Things like attending a virtual concert, taking a virtual vacation, and purchasing and trying on digital apparel.

In the midst of the coronavirus pandemic, the metaverse could be a game-changer for the work-from-home shift.

Employees could see their coworkers virtually instead of on a video call grid.

Facebook has released Horizon Workrooms, a meeting program for businesses to use with their Oculus VR headsets, however early feedback has been mixed. The headsets cost \$300 or more, putting the most cutting-edge experiences in the metaverse out of reach for most people.

CHARITY:

We believe that if a project does not have a true purpose that affects people's lives, it is nothing more than soap bubbles.

Why don't we aid hundreds of thousands of people suffering from inadequate facilities and abandonment around the world if our issue is poor people in Africa?

This is exactly what we set out to do. The project's ultimate purpose is to make significant donations to African social welfare groups both locally and abroad.

We'll put out an NFT program to collect money and donate the proceeds to charitable organizations.

AIMS:

- 1- To enhance the living situations of Africans who are poor.
- 2- To provide a play-to-earn game in which you can acquire Flame Meta tokens and then transfer them to a real-world wallet.
- 3- To get to a point where individuals don't just want to make money, but want to invest in order to be a part of a larger community.

Tokenomics:

What distinguishes The Flame Metaverse (\$FlameMeta) from other cryptocurrencies?

- o We've also carefully adjusted the tokenomics to ensure long-term viability.
- o Take use of your locked liquidity as well as the token that has a meaningful function, such as our upcoming game.

Total supply: 100,000,000

95 % Locked Liquidity Pool

5 % BUSD Rewards for Holders

5 % Marketing

2% LP

Game:

To be announced very soon...
